USI SOFTBALL CLINICS 2010

The USI Softball Clinics are developmental clinics where the main purpose is to teach the basic skills and fundamentals of the game of softball. The clinics will be directed by USI Softball Head Coach, Sue Kunkle with assistance from her coaching staff and very talented athletes that are currently a part of the USI softball program. We promise to provide a fun and energetic atmosphere that will foster learning and will ensure that each athlete will have a great time while learning new skills.

The Clinic also serves as a great time for your child to meet the current USI softball players. These outstanding student-athletes serve as great role models and will be there to assist during all clinic sessions.

Sessions Offered

Pitching Clinics: Pitchers that are interested in learning the proper fundamentals of pitching as well as developing control, velocity, and new breaking pitches. Must bring your own catcher.

Catching Clinics: A clinic for catchers to work on receiving pitches, framing, blocking, throwing and all other skills that make a great catcher. Bring your gear!

Hitting Clinics: A clinic designed to help you with the ins and outs of hitting. We will cover all aspects of hitting in an instructional and circuit like set-up where participation and interaction will be the focus. Hitting clinic focus will be on fundamentals, explosive hitting, inside/outside pitch, pitch selection and all other aspects that make a great hitter.
